

Double Braid 24 strand sleeve made from a blend of Technora and blue polyester. 100% Vectran core.

New Utility Catch Off

Yale Cordage has created a solution for mid span catch-offs when using 12-strand single braid polyester stringing lines. The new prusik configuration allows for easy on and off during a pull.

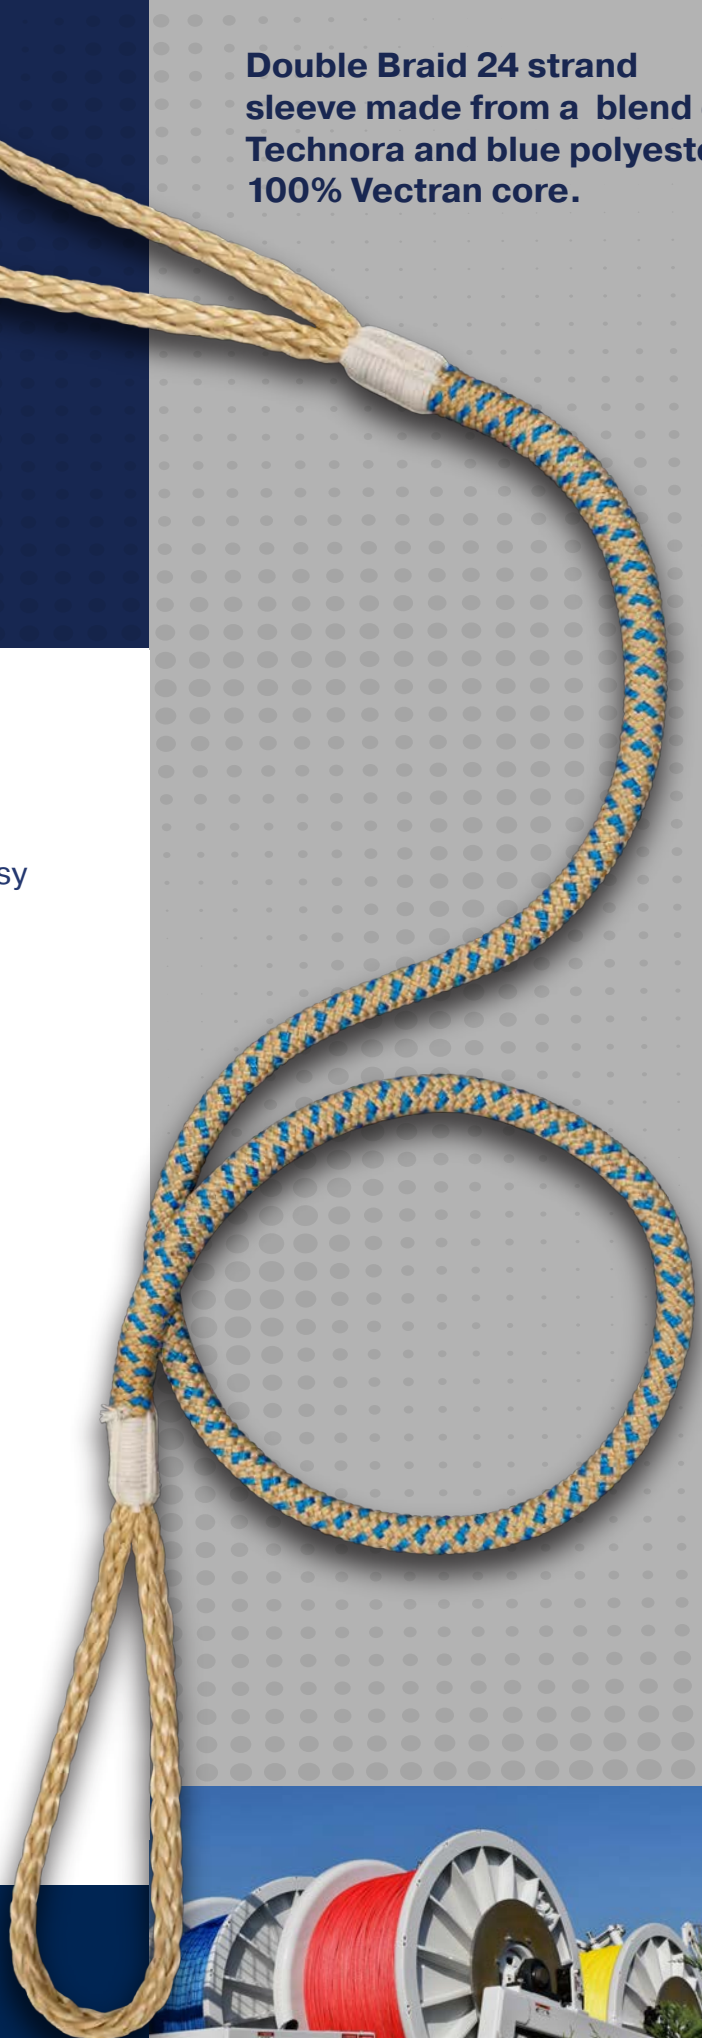

- Fully tested using Yale 5/8 PE- 12 Stringing line.
- Available in 48" and 72" lengths.
- Whipping on sleeve ends to prevent fraying in the field.

Using a Prusik Knot to secure the Utility Catch Off

Notes:

- Not for overhead lifting.
- Do not exceed 3,000lbs of force.
- Product is not recommended for use on HMPE ropes.
